

I use the weather and traffic every day. I also pay for this service, what would make you think to disallow that. It is useful to me and is part of the reason I chose XM, broadcast stations do not offer me the level of convenience that instant traffic does. If you can not assure me a 24 hour instant traffic broadcast station for the metro areas I travel to everyday, please leave my XM alone. Thanks, one of the people whom you are supposed to be serving.
